WHERE ARE WE?

AFRAGOLA

Afragola is an Italian town of 62,404 inhabitants in the north of Naples. Historically it represents one of the major centers of the Neapolitan hinterland.

The first time in which the city is mentioned is in 1105 as "Afragone" or "Afragolla". The origin of the name could derive from Villa Fragorum (villa of strawberries), or from the word *strawberries* in dialect, even if they are not a local product.

The emblem of the city consists of a gold-colored Samnite shield on which a hand holding four red strawberries is superimposed. The whole is enclosed on the sides by a laurel and an oak branches, tied together by a tricolor ribbon.

OUR HISTORY

The Institute was born as a branch of the Vocational School "Don Minzoni" in Giugliano in Campania, near Naples, to cope with the educational needs of young people of a large territory located at the north of Naples. From September 1, 1989 it works as a Professional Institute for Commerce and Tourism in Afragola, as a result of a decree establishing autonomy by the Ministry of Education.

Beginning in the 2010/2011 school year the Institute has welcomed the technical education.

"Sandro Pertini" Institute operates in a modern and cozy establishment. The building is divided on three floors. There are 47 classrooms (with interactive whiteboard), 4 labs, an auditorium, a library and an indoor gym. It is very big and equipped with sports equipment and appropriate ramps access reserved to disabled. It is integrated by external structures.

1989

2011

SCHOOL

2020

2002

Since March 2002 the Institute has changed name in I.P.S.S.C.T. "Sandro Pertini".

2012

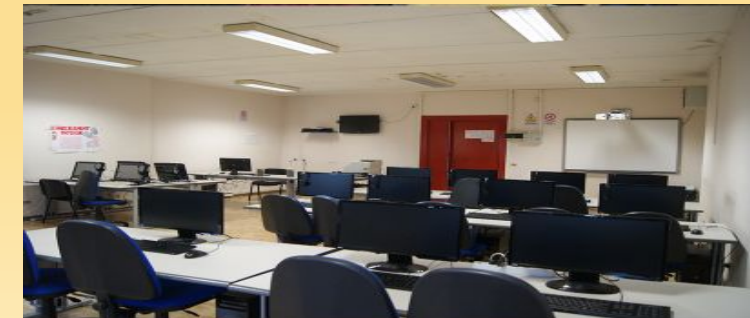

In the 2011/12 school year, the Institute has welcomed Human Sciences and Scientific high school too.

The Auditorium is equipped with an appropriate microphone and sound system and its width make it suitable to various activities. The Library is currently adequately supplied with texts on different topics.

LABORATORY AND EQUIPMENT

- N.1 Scientific Laboratory
- N.2 Informatic Laboratory
- N.1 Language Laboratory
- N.1 Multi-purpose Laboratory
- N.2 Dental Laboratory
- N.1 Gym
- N.1 Sports Ground
- N.1 Auditorium
- N.1 Library

-

- Be a role model for students
- Create a caring environment
- Share personal experiences
- Teach them to be accountable for mistakes
- Encourage them to help others
- Monitor the Internet use

So, a teacher must include **skills in communication, listening, collaboration, adaptability, empathy and patience, exchange of best practices and a lifelong love of learning.**

COURSES

01 HIGH SCHOOL EDUCATION

- HUMAN SCIENCES
- APPLIED SCIENCE

02 TECHNICAL EDUCATION

- TOURISM
- ADMINISTRATION, FINANCE AND MARKETING

03 PROFESSIONAL EDUCATION

- DENTAL TECHNICIAN
- HEALTH AND SOCIAL CARE SERVICES
- PROMOTIONAL AND MARKETING SERVICES

INVALSI

INVALSI was created in 1999 on the proposal of Minister Luigi Berlinguer. The main task of this institution is to prepare and carry out periodic and systematic checks on the learning outcomes of Italian students (using tests), to elaborate the results, to improve the evaluation activities of the school system and to ensure the Italian participation to international surveys on the quality of school systems. The tested classes are:

- The second and fifth classes of primary school
- The third one of lower secondary school
- The second and fifth ones of the upper secondary school

All students have Italian, Mathematics and English (Reading and Listening) tests to do; the second classes of the primary school haven't the English test.
